Z31.84 Fertility Preservation

Z31.84 Fertility Preservation

V25.8 Postvasectomy Sperm Count

Other: _____

Instructions for Semen Analysis:

An appointment must be scheduled in advance by contacting our office at (317) 817-1147.

Patients must present their driver's license and a signed Andrology Test Requisition form at their appointment. Payment can be made by check, cash, Visa, or MasterCard.

The patient should refrain from ejaculation by any method for 2 to 5 days prior to their appointment. Failure to abstain for 2-5 days can lead to unreliable results and necessitate repeat testing.

The specimen should be collected by masturbation into the sterile container provided by the laboratory. Spouses or partners may accompany the patient, but it should be noted that contamination of the semen with either saliva or vaginal fluids can have adverse effects on the quality of the specimen and necessitate repeat testing.

Prior to collection, patients will be asked to fill out a short questionnaire to assist the laboratory and physician in the interpretation of the test results.

Results will be sent to the requesting physician's office within 3 to 5 business days and will not be given directly to patients.
